Professional Profile

AWS Cloud Engineer and DevOps professional with 15+ years of experience across BFSI, FinTech, cloud platform delivery, production operations, and enterprise technology consulting. Strong background in AWS infrastructure, Terraform, CI/CD, Dockerized workloads, monitoring, secure cloud delivery, and SLA-driven operations.

Experienced in supporting technical stakeholders, translating business requirements into implementation-ready solutions, and contributing to cloud architecture discussions, delivery planning, and operational roadmaps. Recently focused on AWS-backed product engineering, GenAI automation, cloud-native systems, and full-stack deployments using AWS, Terraform, React, Node.js, Python, and modern DevOps workflows.

German: B1 working proficiency with active improvement in professional and technical communication. English: C2.

Core Expertise

Cloud & Infrastructure: AWS EC2, ECS Fargate, S3, CloudFront, ALB, Cognito, IAM, Glue, Step Functions, Linux, Terraform

DevOps & Platform Engineering: GitLab CI/CD, GitHub Actions, Jenkins, Docker, Kubernetes, release automation, Infrastructure as Code

Cloud Consulting & Delivery: AWS target architectures, cloud roadmaps, stakeholder coordination, operational planning, technical documentation

Programming & Automation: Python, Bash, JavaScript, Node.js, SQL, workflow automation

Operations & Observability: Datadog, logs, metrics, incident response, production debugging, SLA operations

AI & Automation: Prompt engineering, AI workflow design, n8n, summarization, classification, sentiment analysis

AWS	Terraform	Cloud Architecture	Cloud Roadmaps	GitLab CI/CD	GitHub Actions	Docker	Kubernetes	Python
Node.js	React	Datadog	GenAI					

Featured Cloud & AI Projects

Geo-Sentinel — AWS-Hosted Geopolitical Intelligence Platform

- Designed and implemented a cloud-native AWS architecture for an intelligence platform aggregating global news signals across regions, countries, and media sources.
- Built full-stack architecture using React, Node.js, Python, AWS, Terraform, CloudFront, Cognito, S3, ALB, and EC2.
- Implemented RSS ingestion, sentiment analysis, relevance scoring, report generation, and intelligence transparency features.
- Designed cost-optimized Terraform infrastructure workflows for production-style deployment validation and operational control.
- Integrated Cognito Hosted UI authentication, CloudFront/S3 deployment, GitHub Actions, and secure AWS delivery patterns.

GenAI Content Automation & Lead Qualification Pipelines

- Built AI-assisted workflows for content repurposing, summarization, localization, and structured publishing outputs.
- Developed n8n-based lead qualification pipelines with enrichment, classification, and AI-generated sales summaries.
- Designed reusable automation patterns focused on repeatable delivery, review checkpoints, and operational efficiency.

Professional Experience

Capgemini Deutschland GmbH — Client: European Institution
Cloud DevOps Engineer

Frankfurt, Germany | 02/2021 – 12/2024

- Managed business-critical cloud services and SLA-driven production operations in a regulated enterprise environment.
- Built CI/CD pipelines for Dockerized Django services deployed on AWS ECS Fargate.
- Automated infrastructure provisioning and releases using Terraform and GitLab CI/CD.
- Supported AWS orchestration workflows using Step Functions and Glue jobs.
- Supported cloud architecture discussions and AWS delivery planning with technical and business stakeholders.
- Contributed to scalable and cost-aware AWS infrastructure design decisions for enterprise delivery environments.
- Collaborated with cross-functional teams to align cloud platform implementation with operational and business requirements.
- Implemented operational visibility using Datadog dashboards, logs, metrics, and incident diagnostics.
- Developed Python scripts for ETL support and schema mapping from XSD definitions to Parquet structures.

Capgemini Deutschland GmbH — Client: Private Bank

Frankfurt, Germany | 10/2020 – 01/2021

Technical Business Analyst — KYC / Fraud / Screening

- Performed identity verification, transaction screening, and compliance-focused operational analysis.
- Coordinated findings with compliance, business, and operational stakeholders.

Capgemini Deutschland GmbH — Client: FinTech Institution

Bad Homburg, Germany | 08/2020 – 09/2020

Senior Programmer & DevOps Lead

- Translated business requirements into implementation-ready technical specifications.
- Supported delivery quality, release planning, deployment readiness, and technical coordination.

Capgemini Deutschland GmbH — Client: Private Bank

Frankfurt, Germany | 10/2019 – 07/2020

DevOps Engineer — CI/CD & Deployment Engineering

- Managed Jenkins-based deployment workflows, Jira coordination, and release documentation.
- Monitored deployments using webMethods Deployer and resolved production deployment issues.

Infosys Ltd. — Core Banking

Hyderabad, India | 10/2006 – 04/2012

Senior Systems Engineer

- Delivered customization, release support, and production support for enterprise core banking systems.
- Contributed to proof-of-concept initiatives integrating CRM and virtual banking solutions.

Education & Certifications

M.Sc. Cognitive Science, RPTU Kaiserslautern, Germany	2012 – 2015
B.E. Information Technology, SGGS Institute of Engineering and Technology, India	2002 – 2006
AWS Cloud Engineering Program, neue fische GmbH	2026
