Professional Profile

Cloud and platform engineering professional with 15+ years of experience across enterprise technology, FinTech, BFSI, DevOps, production operations, and cloud delivery environments. Strong background in AWS infrastructure, Terraform, CI/CD automation, Dockerized workloads, release engineering, monitoring, secure delivery, and stakeholder-facing technical coordination.

Recently focused on cloud-hosted product engineering with hands-on exposure to Node.js backend services, React frontend integration, Python automation, cloud-native deployments, API-driven systems, and AWS-based application delivery using CloudFront, S3, Cognito, ALB, EC2, IAM, and GitHub Actions.

Comfortable working across infrastructure, platform engineering, deployment automation, backend integrations, and product-focused engineering teams. Interested in SaaS platforms, compliance technology, cloud-native systems, and engineering environments where ownership, reliability, and structured problem-solving matter.

German: B1 working proficiency with active improvement in professional and technical communication. English: C2.

Core Expertise

Cloud & Infrastructure: AWS EC2, ECS Fargate, S3, CloudFront, ALB, Cognito, IAM, Linux, Terraform

DevOps & Platform Engineering: GitHub Actions, GitLab CI/CD, Jenkins, Docker, release automation, Infrastructure as Code

Backend & Automation: Node.js, REST API concepts, Python scripting, Bash, SQL, workflow automation

Frontend Exposure: React, Vite, dashboard integrations, authentication flows, cloud-hosted frontend delivery

Operations & Observability: Datadog, logs, metrics, incident response, production debugging, SLA-driven operations

AI & Automation: Prompt engineering, GenAI workflows, n8n automation, summarization, classification, sentiment analysis

AWS Terraform Cloud Architecture CI/CD GitHub Actions GitLab CI/CD Docker Node.js React Python CloudFront Cognito
S3 ALB DevOps Platform Engineering SaaS

Featured Cloud & Product Engineering Projects

Geo-Sentinel — AWS-Hosted Geopolitical Intelligence Platform

- Designed and implemented an AWS-hosted intelligence platform aggregating global news signals across regions, countries, and media sources.
- Built full-stack architecture using React, Node.js, Python, AWS, Terraform, CloudFront, Cognito, S3, ALB, EC2, and GitHub Actions.
- Implemented backend API workflows integrating Node.js services with Python-based RSS ingestion, sentiment analysis, relevance scoring, and report generation.
- Developed product features including authentication flow, intelligence dashboards, report downloads, source transparency, and scoring-based result presentation.
- Designed cost-aware Terraform infrastructure workflows enabling production-style deployment validation and operational control.
- Integrated GitHub Actions CI/CD with AWS OIDC authentication, S3 deployment workflows, and CloudFront invalidation patterns.

GenAI Content Automation & Lead Qualification Pipelines

- Built AI-assisted workflows for content repurposing, summarization, localization, and structured publishing outputs.
- Developed n8n-based lead qualification pipelines with enrichment, classification, and AI-generated sales summaries.
- Designed reusable automation patterns focused on operational efficiency, review checkpoints, and repeatable delivery workflows.

Professional Experience

Capgemini Deutschland GmbH — Client: European Institution

Frankfurt, Germany | 02/2021 – 12/2024

Cloud DevOps Engineer

- Managed business-critical cloud services and SLA-driven production operations in a regulated enterprise environment.
- Built and supported CI/CD pipelines for Dockerized Django services deployed on AWS ECS Fargate.
- Automated infrastructure provisioning and release workflows using Terraform and GitLab CI/CD.
- Contributed to cloud delivery planning, operational coordination, and stakeholder-facing technical discussions.

- Supported scalable and cost-aware AWS infrastructure implementations for enterprise delivery environments.
- Implemented operational visibility using Datadog dashboards, logs, metrics, and incident diagnostics.
- Developed Python scripts for ETL support and schema mapping from XSD definitions to Parquet structures.
- Collaborated with cross-functional teams to align cloud platform implementation with operational and business requirements.

Capgemini Deutschland GmbH — Client: Private Bank Frankfurt, Germany | 10/2020 – 01/2021
Technical Business Analyst — KYC / Fraud / Screening

- Performed identity verification, transaction screening, and compliance-focused operational analysis.
- Coordinated findings with compliance, business, and operational stakeholders.

Capgemini Deutschland GmbH — Client: FinTech Institution Bad Homburg, Germany | 08/2020 – 09/2020
Senior Programmer & DevOps Lead

- Translated business requirements into implementation-ready technical specifications.
- Supported release planning, deployment readiness, and technical coordination.
- Worked between engineering, business, and operational stakeholders to support reliable delivery workflows.

Capgemini Deutschland GmbH — Client: Private Bank Frankfurt, Germany | 10/2019 – 07/2020
DevOps Engineer — CI/CD & Deployment Engineering

- Managed Jenkins-based deployment workflows, Jira coordination, and release documentation.
- Monitored deployments using webMethods Deployer and supported production deployment troubleshooting.
- Improved operational delivery visibility through structured release coordination.

Infosys Ltd. — Core Banking Hyderabad, India | 10/2006 – 04/2012
Senior Systems Engineer

- Delivered customization, release support, and production support for enterprise core banking systems.
- Supported business-critical banking applications with strong focus on operational reliability and issue resolution.
- Contributed to proof-of-concept initiatives integrating CRM and virtual banking solutions.

Education & Training

M.Sc. Cognitive Science , RPTU Kaiserslautern, Germany	2012 – 2015
B.E. Information Technology , SGGS Institute of Engineering and Technology, India	2002 – 2006
AWS Cloud Engineering Program , neue fische GmbH	2026
AWS Certified Cloud Practitioner	In preparation

Languages

English — C2 German — B1, actively improving Hindi — C2 Telugu — Native Portuguese — A2

Additional Information

German citizen. Based near Mannheim metropolitan region with strong commuting feasibility for hybrid engineering roles. Interested in cloud platforms, SaaS product engineering, DevOps automation, backend-integrated systems, and modern AWS-hosted application environments.
